INSTRUMENT VALIDATION FORM

NAME OF VALIDATOR: DATE OF VALIDATION:

PROFESSION:

POSITION:

INSTITUTION:

TITLE: Ausculta: An intelligent respiratory auscultation, monitoring, and rehabilitation-support system.

DEVICE NAME: Ausculta

Ausculta is a mobile health application designed to assist individuals with asthma in monitoring and understanding their respiratory health. It provides a user-friendly interface where users can navigate respiratory health information and access features related to respiratory assessment and monitoring.

The system is designed to present respiratory-related information in an organized manner, allowing users to explore their assessment results and relevant health information. Ausculta is currently presented as a prototype for evaluation, with its interface and features designed for user navigation and assessment. It is not intended to replace professional medical consultation or serve as a standalone diagnostic tool.

Criteria	Context	5	4	3	2	1
1. General Relevance	Relevant to the needs of individuals with asthma.					
2. Functionality	Supports its intended purpose and user needs.					
3. Performance and Usability	Easy to navigate and interact with.					
4. Accessibilty	Information and features are easy to access and understand.					
5. Reliability	Provides consistent and dependable functions.					

Senior High School Department

SECTION B – PATIENTS WITH ASTHMA

Criteria	Rating	Remarks
1. Ease of Navigation		
2. Ease of Use		
3. Clarity of Information		
4. Interface Design		
5. Perceived Usefulness		
6. User Acceptability		

Validated by:

INSTITUTION	**VALIDATOR**	**SIGNATURE**

SECTION C – PULMONOLOGIST / HEALTH PRACTITIONER

Criteria	Rating	Remarks
1. Clinical Relevance		
2. Clinical Appropriateness		
3. Information Clarity		
4. Patient Safety		
5. Clinical Usefulness		

Validated by:

INSTITUTION	**VALIDATOR**	**SIGNATURE**

SECTION D – COMPUTER ENGINEER

Criteria	Rating	Remarks
1. Usability		
2. User Interface Design		
3. Functionality		
4. System Organization		
5. Technical Feasibility		

Validated by:

INSTITUTION	**VALIDATOR**	**SIGNATURE**

SECTION E – ELECTRICAL ENGINEER

Criteria	Rating	Remarks
1. Hardware Feasibility		
2. Sensor Integration		
3. Signal Acquisition		
4. Electrical Safety		
5. System Reliability		

Validated by:

INSTITUTION	**VALIDATOR**	**SIGNATURE**
